

**National Interagency Coordination Center
Incident Management Situation Report
Tuesday, November 6, 2007 – 0530 MST
National Preparedness Level 1**

National Fire Activity

Initial attack activity: Light (144 new fires)
 New large fires: 3 (*)
 Large fires contained: 2
 Uncontained large fires: 4
 Area Command Teams committed: 0
 NIMOs committed: 0
 Type 1 IMTs committed: 1
 Type 2 IMTs committed: 2
 Fire Use Teams committed: 0

** Uncontained large fires do not include WFU or confine/contain incidents. **

Southern California Area (PL 3)

New fires: 7
 New large fires: 1
 Uncontained large fires: 2
 Type 1 IMTs committed: 1
 Type 2 IMTs committed: 2

IMT 1 (Opliger) is assisting FEMA in managing a mobilization center in Chino, CA.

Poomacha, Monte Vista Unit, CAL FIRE. IMT 2 (Walker). Seven miles east of Pauma Valley, CA. Timber, chaparral and grass. Isolated interior burning.

Santiago, Orange County FD. Unified Command between IMT 2 (Smith), CAL FIRE and Orange County. Twelve miles east of Santa Ana, CA. Chaparral and grass. Small flare-ups.

O’Harrel, Inyo NF. Sixteen miles west of Benton, CA. Timber and grass. Backing and short runs. Last narrative report unless significant activity occurs.

RETARDANT DROP SAFETY

Having retardant dropped on a fire should be a routine event. However, there are risks associated with retardant drops that can pose serious threats to personnel and equipment. Consider the following for all drops:

- Be aware of the location of lead planes and airtankers during retardant drop operations.
- Be sure you have positive contact with the lead plane or airtanker before the drop.
- Personnel can be injured by the impact of retardant drops. Clear personnel out of the target area when the drop is conducted. If an individual is unable to retreat to a safe place, the best method for minimizing injury from the drop is to:
 - Hold you handtool away from your body.
 - Lie face down with hardhat in place and head toward the oncoming aircraft.
 - Grasp something firm to prevent being carried or rolled about by the retardant.
 - Do not run unless escape is ensured.
 - Get clear of dead snags and tops.
 - Be aware of rolling debris below the drop site in steep terrain.
- Working in an area covered by retardant should be done with caution due to slippery surfaces.
- If possible, wash the retardant off your skin to prevent irritation
